

WORLD OZONE DAY

Anastasija Jovanović VIII/1

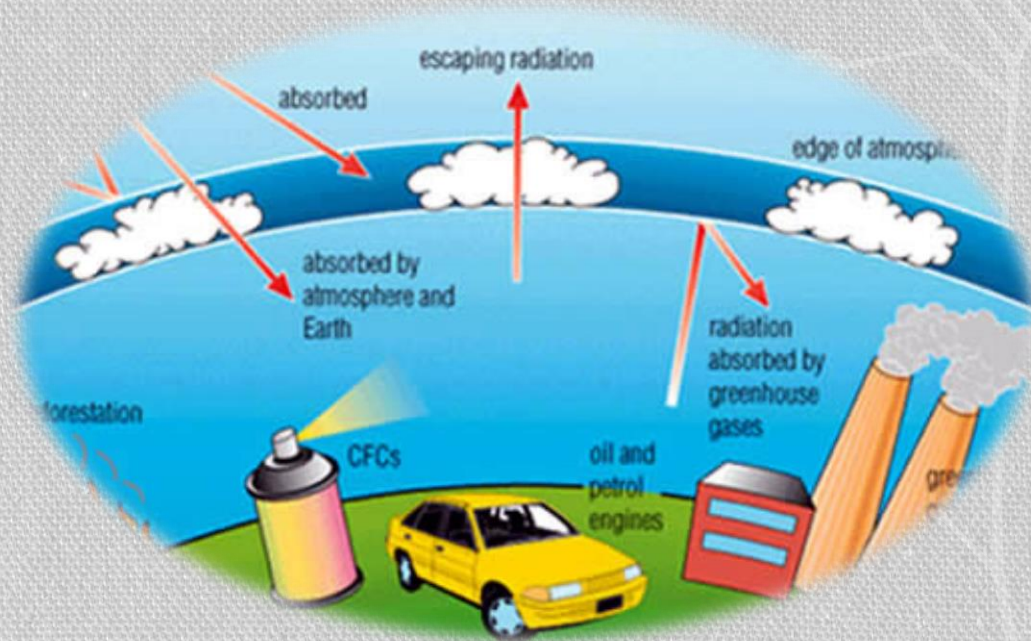

- Since 1995, 16th September has been celebrated all over the world as the World Ozone Day

- The Ozone protects us from harmful solar radiation and is important for the life on Earth.

- The Ozone is damaged by freons.
- These are chemicals found in deodorants and hair sprays...

- Since 1970 scientists have discovered that the Ozone is thin around the South Pole.
- That change is labeled the Ozone hole.
