# France through my eyes

Petar Petrović - 8.2

- France is for me one of the most beautiful countries that ever existed

- When someone mentions France my first thought is the Eiffel tower in Paris and its flag colors

- France is known for its Eiffel tower, baguette bread, artists, architecture and fashion

- Their most famous fashion brands are
- Saint Lauren and Christian Dior which are also famous for their fragrance and perfumes
- Chanel
- Louis Vuitton
- And many more

What I like about France?

- Well that's not a simple question like someone would think but I'll try to simplify it

- I like their modernity, their taste in cars and cosmetics (talking about fragrances and perfumes)

- The fact that France is a symbol of art and beauty of its cities

Why should someone visit France?

- Well that's simple
- France is one of the most beautiful countries and people in France are really friendly to a tourist
- To see their old buildings, castles, palaces, works of art

Most famous artists in France

- One of them would definitely be Claude Monet
- Claude Monet is widely regarded as the pioneer of Impressionism, an art movement that aimed to capture the effects of light and color. Monet's unwavering commitment to painting en plein air and his inventive use of brushstrokes paved the way for an era in art.

- Gustave Eiffel
- Born on 15.12.1832 in Dijon and died on 28.12.1923 in Paris
- He was a French engineer whose main work is the French tower that now bears his name
- After studying chemistry, he devoted himself to construction. He was the author of numerous artistic buildings, among which the Statue of Liberty in New York stands out.

The end

- Sadly everything that's good ends quickly, just like this presentation :)
